PROFESSIONAL EXPERIENCE

02/2021 - 10/2025

mPhase · Montréal

QA Analyst & Software Developer

Development of a web platform and applications used by over 10,000 users.

Angular · JavaScript · Objective-C · Java · Node.js · Docker · REST APIs · Git · MongoDB · Atlassian

> *Team of 10 developers within a 13-person company. Agile/Scrum framework using time-boxed sprints, CI/CD pipeline using GitHub Actions and Sentry, code review for each PR followed by QA.*

Main tasks:

- Developed and implemented new features in Front-End and Mobile.
- Analyzed and resolved bugs, ensuring tech product quality (QA).
- Collaborated with back-end teams to integrate APIs REST (Node.js), conducting testing and debugging via Postman and Ngrok.
- Data querying and analysis using MongoDB, with fundamental knowledge of NoSQL.
- Collaborated on code reviews and pair programming sessions, contributing to team activities in an Agile setting.

Key features:

- Internal communication module
- Internal forms (disciplinary and technical forms)
- Automatic vehicle departures and arrivals based on speed and location
- Overview of upcoming routes for drivers
- Improvements to mobile app UI and UX
- Display of recent changes to routes, etc...
