Agile/Scrum, Code Review, QA

## HOBBIES

### Squash

### Balle Molle

In 2 summer leagues

### Arts

In all its forms:  
exhibitions, museums,  
circus, music, theater,  
drag, etc.)

### A favorite subject?

The city of Montreal  
and which means of  
transport to choose  
to go from point A to  
B optimally.

## PROJECTS

### mTransport - Driver Application

This application, developed natively is a valuable tool for school bus drivers to determine the correct route, locate scheduled stops along a route, and check the presence of students (expected, absent, or already on board).

Java

Android Studio

Objective-C

Xcode

Node.js

REST APIs

### mTransport - Parent Application

Initially developed natively and then recently using React Native, this application allows parents to track their children's journeys, receive real-time notifications, and access information on routes and schedules.

React Native

Java

Android Studio

Objective-C

Xcode

Node.js

REST APIs

### mTransport - Portal Web

Transport - Web Portal is a complete platform that includes many tools that allow dispatchers to track the vehicle fleet in real time on a map

AngularJs

JavaScript

Node.js
